

AGRIBELT 1400 | 7402 5340

**Heavy duty conveyor belt fabric for high load manure removal systems.
Extra strong, dimensionally stable and built for tough barn conditions.**

agribelt 1400 is designed for manure removal systems that operate under heavy loads and require greater structural reserve. Its higher weight provides a firmer, more stable belt path, especially in long barn lanes or systems with frequent scraping cycles. Its coated surface resists chemicals, moisture, and daily abrasion, ensuring consistent performance even under harsh barn conditions.

With reliable tracking and low maintenance requirements, agribelt 1400 supports uninterrupted hygiene routines in operations where durability and a long service life are essential.

Custom Item

precisely manufactured in 252 cm width with optional configurations available for specific application requirements.

Dimensionally Stable

maintains shape and size under mechanical stress, temperature changes, and long-term use

Reduces Surface Degradation

resistant to certain manure and organic waste for stable material performance
