

FLEXITANK 1150 PVC | 7611 5340

Heavy PVC formulation for secondary containment.
Calendered coating layer for high leak tightness.

flexitank 1150 PVC is designed for secondary containment systems that require high leak resistance. Its durable PVC composition provides strong chemical and mechanical stability, and its 1150 g/m² weight supports long-term use in fixed installations. The calendered coating layer improves sealing performance and surface integrity.

This material offers the strength and leak protection that operators depend on for drip trays, emergency containment areas, and similar applications.

Advanced Calendering Technology

ensures excellent barrier integrity for high leakage safety

Increased Stability

material weight of 1150 g/m² provides increased stability and enhanced safety in demanding applications

Premium PVC Compound

high-quality PVC formulation with strong resistance to mineral oils ensures durable and reliable performance

Other colors on request
