BARRIER 700 | H2528

Flexible PVC oil boom fabric engineered for reliable containment. Strong, stable, and designed to withstand waves, wind and current.

barrier 700 is a PVC-coated fabric designed for reliable oil boom performance during regular use. It is resistant to chemicals and saltwater, and it retains its mechanical performance when exposed to waves and constant motion. Technicians appreciate how cleanly it welds and how consistently it performs during assembly.

In the field, it provides reliable containment and a long service life - it is a practical material designed to get the job done.

German Engineered

Stable Performance

withstand waves, wind, and currents for stable and reliable performance in challenging marine conditions

Robust Marine durability

withstands seawater, oils, and chemicals for reliable performance

Weather Resistance

state-of-the-art UV stabilizers ensures a reliable weather resistance

Status: 03.2026

Other colors on request

The technical data are approximate values based on average values determined. For manufacturing reasons, deviations of up to -5% are possible. These technical specifications respond to the current state of knowledge and are intended to provide information about our products without legal obligation. These data apply to new goods. Suggested applications do not release the buyer from the obligation to check whether the material is suitable for the intended use.
