OFFSHORE 1400 | H2583

Robust PVC containment fabric for harsh marine conditions.
Reliable performance under waves, wind and strong currents.

offshore 1400 is a PVC boom fabric designed to remain reliable in environments where waves, currents and weather conditions constantly put pressure on the material. It bends without weakening, is resistant to saltwater and chemicals, and maintains stable performance during repeated deployment. Fabricators value its consistent welding behavior, while field teams rely on its ability to maintain secure containment even during challenging operations.

It is a durable, high performance solution for offshore tasks where equipment must work flawlessly day after day.

German Engineered

Status: 03.2026

Durable Coating Performance

high adhesion and hydrolysis resistance extend lifespan in wet environments

Robust Marine Durability

withstands seawater, oils, and chemicals for reliable performance

Stable Performance

withstand waves, wind, and currents for stable and reliable performance in challenging marine conditions

Stress Resistant

maintains stability and strength even under continuous mechanical stress in offshore applications

Weather Resistance

state-of-the-art UV stabilizers ensures a reliable weather resistance

Other colors on request, See color chart

The technical data are approximate values based on average values determined. For manufacturing reasons, deviations of up to -5% are possible. These technical specifications respond to the current state of knowledge and are intended to provide information about our products without legal obligation. These data apply to new goods. Suggested applications do not release the buyer from the obligation to check whether the material is suitable for the intended use.
