

FLEXITANK 950 PVC | H3543

**Flexible PVC for small spill trays and containment units.
Calendered layer for reliable leak tight performance.**

flexitank 950 PVC combines flexibility and leak-proof security for smaller containment applications. Its PVC formulation provides excellent resistance to contact media, and the calendered coating improves sealing properties. The material is easy to work with during fabrication and allows for simple installation in compact or custom-shaped retention areas.

It is a reliable choice for smaller secondary containment systems that require flexibility, durability, and dependable sealing.

Advanced Calendering Technology

ensures excellent barrier integrity for high leakage safety

Flexible Bending Strength

especially flexible material quality ensures reliable bending resistance for safe use in containment trays

Premium PVC Compound

high-quality PVC formulation with strong resistance to mineral oils ensures durable and reliable performance
