

WATER STORE 1100 ACS | H3580

ACS-certified quality for the storage of drinking water.
Calendered PVC design for low leakage and reliable performance.

water store 1100 ACS is produced to ACS-certified quality standards and meets the requirements for storing drinking water under safe and controlled conditions. Its calendered coating ensures low leakage performance and consistent material behavior over the long term. The additional lacquer contributes to a clean, consistent surface when tanks are filled, moved, or subjected to mechanical stress.

water store 1100 ACS is ideal for operators who require dependable containment with defined quality standards, providing a solid and predictable material foundation.

**German
Engineered**

ACS-Certified Quality

ACS-certified material quality ensures safe and compliant storage of potable water

Durable Seam Connections

excellent weldability across all common welding methods ensures secure and durable seam connections

Durable Protective Lacquer

a protective surface lacquer enhances durability and ensures a long service life

Safe and Compliant Storage

phthalate-free PVC coating suitable for potable water ensures safe and compliant storage applications

Other colors on request

The technical data are approximate values based on average values determined. For manufacturing reasons, deviations of up to -5% are possible. These technical specifications respond to the current state of knowledge and are intended to provide information about our products without legal obligation. These data apply to new goods. Suggested applications do not release the buyer from the obligation to check whether the material is suitable for the intended use.
