

OFFSHORE 1600 BL | H4591

**Heavy-duty PVC/TPU blend for the toughest offshore conditions.
Maximum abrasion resistance for long-life containment booms.**

offshore 1600 BL is designed for the most challenging containment scenarios, where constant movement, rough seas and prolonged deployment are the norm. Its PVC/TPU coating provides exceptional abrasion resistance and its high performance base fabric provides high tensile, enabling the boom to withstand repeated towing and harsh contact conditions.

The material can be processed reliably in the workshop and performs consistently offshore, giving teams the confidence that containment integrity will be maintained even under extreme strain.

Durable Coating Performance

high adhesion and hydrolysis resistance extend lifespan in wet environments

Robust Marine Durability

withstands seawater, oils, and chemicals for reliable performance

Stress Resistant

maintains stability and strength even under continuous mechanical stress in offshore applications

Superior Stability

PVC/TPU Blend formulation provides extra high abrasion resistance

Weather Resistance

state-of-the-art UV stabilizers ensures a reliable weather resistance
