BARRIER 900 | H5551-6

High strength PVC barrier fabric for demanding conditions.
Increased robustness for harsher currents and prolonged exposure.

barrier 900 offers greater stability and strength for oil boom systems operating in rough waters. Its state-of-the-art PVC coating provides strong adhesion and predictable processing, as well as solid long-term resistance to chemicals, saltwater and abrasion. The fabric is flexible enough for smooth deployment, yet firm enough to retain its shape when under load.

For crews working in stronger currents or carrying out extended operations, it provides reliable containment and reassuring toughness.

German Engineered

Stable Performance

withstand waves, wind, and currents for stable and reliable performance in challenging marine conditions

Robust Marine Durability

withstands seawater, oils, and chemicals for reliable performance

Weather Resistance

state-of-the-art UV stabilizers ensures a reliable weather resistance

Status: 03.2026

Other colors on request

The technical data are approximate values based on average values determined. For manufacturing reasons, deviations of up to -5% are possible. These technical specifications respond to the current state of knowledge and are intended to provide information about our products without legal obligation. These data apply to new goods. Suggested applications do not release the buyer from the obligation to check whether the material is suitable for the intended use.
