

## SERVICE WATER 1100 F | H7609

**Water storage fabric with recycled PET base.**  
**Flexible tank material with high processing quality.**

service water 1100F is a water storage system with a recycled PET base fabric and a controlled PVC formulation. This material can be processed cleanly and consistently, enabling efficient assembly of large tanks. Its flexibility allows tanks to adapt to movement and pressure changes while maintaining structural integrity.

service ater 1100 F is a practical solution for operators requiring a reliable material with stable handling characteristics for building large-format water storage systems.

**German  
Engineered**

### **100% Recycled Base Fabric**

base fabric made from 100% GRS 4.0-certified recycled yarns achieves a 75% reduction in energy consumption during yarn production

### **Lightweight for Flexibility**

a low weight of 1100 g/m<sup>2</sup> provides maximum flexibility for easy handling and versatile use

### **Optimized Performance**

specialized surface lacquer improves dirt-repellent behavior and enhances weldability for clean handling and reliable seam quality

### **Reliable PVC Formula**

provides strong resistance to environmental influences, ensuring durable and long-lasting performance

### **Strong Adhesion & Stability**

high coating adhesion combined with excellent hydrolysis resistance ensures durable, long-lasting performance

### Other colors on request

The technical data are approximate values based on average values determined. For manufacturing reasons, deviations of up to -5% are possible. These technical specifications respond to the current state of knowledge and are intended to provide information about our products without legal obligation. These data apply to new goods. Suggested applications do not release the buyer from the obligation to check whether the material is suitable for the intended use.
