

FLEXITANK 720 TPU ES ES | H8545

TPU material for oil resistant containment systems.

Durable solution for trays and machine protection covers.

flexitank 720 TPU ES ES is designed for secondary containment and machine protection in environments where oil resistance is critical. Its TPU formulation withstands continuous contact with oily substances and provides stable mechanical handling. Its durability makes it ideal for trays, coverings, and other protective installations that see frequent use.

It is a practical, resilient material for workshops and industrial environments that need reliable protection from spills and splashes.

**German
Engineered**

Advanced Calendering Technology

ensures excellent barrier integrity for high leakage safety

High Oil Resistance

Ester-based TPU offers high resistance to mineral oils, ensuring durable and reliable performance

Lightweight for Flexibility

at only 720 g/m², the material offers maximum flexibility for easier handling and use

Maximum Abrasion Resistance

engineered for extreme wear, ensuring a longer lifetime with minimal abrasion

Strong Seam Adhesion

high-adhesion ensures secure and long-lasting weld seam

Other colors on request
