

DOORCOVER 540 | H6519

doorcover 540 is lightweight and highly flexible. It is designed for use with inflatable sealing systems and dock shelter bags. Its airtight construction creates reliable seals and provides effective weather protection.

Doorcover 540 adapts easily to a wide variety of shapes and applications, making it an efficient solution for inflatable loading bay systems. The low-weight PVC construction combines reliable air retention with easy handling during fabrication and installation. Its matt embossed surface provides a refined technical appearance, while the material remains durable enough for everyday operation in demanding logistics environments. With widths up to 205 cm, it supports the efficient production of larger components.

Airtight Performance

designed for applications that require reliable air retention and sealing performance

High Flexibility

adapts easily to different shapes and inflatable constructions without compromising performance

Lightweight Handling

low weight supports efficient processing, installation and everyday handling

Refined Surface

matt embossed finish creates a technical, high-quality appearance
