

KEDER 2200 LW | H5037

Low Wick Performance for Long Life Structures. Stay Dry. Stay Strong. Stay Connected.

Where moisture threatens materials over time, keder 2200 LW stands firm. Its low-wick yarn keeps water from traveling through the fabric, helping structures resist mold, sagging, and long term wear. It connects tent modules with a smooth, stable motion and holds them confidently in place.

For builders seeking longevity and reliability, it offers peace of mind woven right into the core.

Low-wick

low-wick base fabric for optimized performance and reduced moisture uptake leads to a longer life

Structural Stability

supports uniform tension distribution across the tent surface and reliable sliding into profiles

Weather Resistance

state-of-the-art UV stabilizers ensures a reliable weather resistance

Weldability

excellent weldability and less smoke during welding
