

HOSE 650 AST | 4563 5042

**Antistatic ventilation hose for reliable underground airflow.
Safe, stable air supply where fresh air is critical.**

hose 650 AST is designed for environments where clean, circulating air is essential for the safety of teams working underground. Its antistatic treatment prevents charge build-up in dry, dusty tunnels and mines, thereby reducing risk and ensuring uninterrupted airflow. The material remains flexible during installation, is resistant to mechanical stress, and retains its shape even in long tunnel runs. Designed for continuous operation in tough underground conditions, it delivers reliable performance in critical ventilation applications. It is a hose that supports crews by keeping the air fresh - shift after shift.

High tear resistance

acc. to DIN 53356

promotes reparability in the event of cracks in the material

Reliable Antistatic properties

antistatic material with surface treatment that meets the technical performance requirements of DIN 21612 (Grade A)
