SCRIM 280 | 7915 5300

Lightweight open mesh fabric for industrial and agricultural applications. Air permeable grid structure with dependable stability.

scrim 280 strikes the perfect balance between low weight and a reliable structure, making it ideal for use in industry, transport and agriculture. Its open area of around 40% improves airflow, reduces resistance and helps the fabric to remain flexible during installation.

Despite its low mass, the PVC coating reinforces the grid to ensure long-lasting performance. This versatile scrim adapts easily to various protective and structural uses where breathability and stability are essential.

German Engineered

Flexible Accross Requirements

available in two standard widths - 250 cm and 370 cm - for flexible use

High Stability

PVC-coated scrim structure provides high stability and strength despite its low weight

Improved Ventilation

controlled air permeability, pressure equalization, and stable material performance

Status: 03.2026

370 red
586 lagune
543 royal blue
691 bronze green
682 russian green
763 alu grey
905 black

Other colors on request. Print colors may differ from the original depending on the paper and printing process.
