SCRIM 250 | 7916 5300

Ultra light scrim for ventilation friendly coverings.
Strong grid stability at minimal weight.

scrim 250 is the lightest product in the scrim range. It is designed for situations where unrestricted airflow and minimal weight are essential. With an open area of around 45%, it allows for ventilation while providing the necessary reinforcement for coverings, screens, or protective layers. Its PVC-coated grid ensures stability despite its low weight.

It is a practical option for users who need an airy material that is easy to handle yet maintains structural integrity.

German Engineered

Status: 19.06.2026

Flexible Accross Requirements

available in two standard widths - 250 cm and 370 cm - for flexible use

High Stability

PVC-coated scrim structure provides high stability and strength despite its low weight

Improved Ventilation

controlled air permeability, pressure equalization, and stable material performance
