BELLOW 25 | H5544

Light, flexible and tough for compact bellows.
Clean folding, easy welding, dependable abrasion resistance.

bellow 25 is the lightweight choice when bellows must fold tightly, move frequently, and withstand everyday wear. Its bi-sided PVC coating provides a sealed, easy-to-clean surface and reliable weldability. Meanwhile, its flexible polyester base ensures smooth pleat formation without stiff corners. It tracks neatly, resists scuffing, and maintains its geometry during motion in machine protection, lift covers, and compact connectors.

It is a practical, low-mass material that speeds fabrication and stays durable in continuous service.

German Engineered

Improved Installation Efficiency

low material weight for easier handling and reduced load

Reliable Strength

enhanced stability through optimized material thickness of 0,25 mm

Protection Against Mechanical Stress

reinforced with PVC on both sides for improved durability, abrasion resistance for dynamic applications

Status: 03.2026
